# WHERE ARE THE WORMS?

GAHI shows the geographical distribution of neglected tropical diseases transmitted by worms.

All GAHI resources are available on an open access basis.

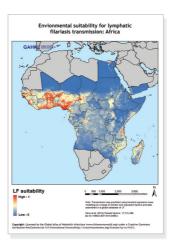

Dynamic and static maps to help inform NTD control decisions

## O ACCESS DATA

Download data sets from over 40,000 surveys covering 111 countries

## TRAINING RESOURCES

Training materials to develop skills to support NTD control

# Create, download and share maps and data on:

- Soil-transmitted helminths, lymphatic filariasis(LF) and schistosomiasis at country and regional levels
- Sub-national water supply and sanitation
- Treatment cover for LF at implementation level

www.thiswormyworld.org

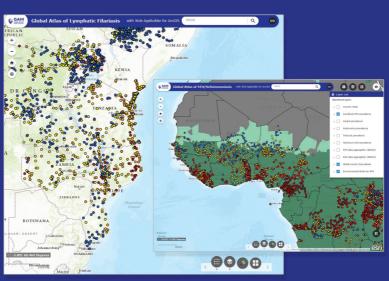

#### **GAHI** enables users to:

- 1. Find ready-made maps and data by region, worm or type of map
- 2. Build your own dynamic maps
- 3. Access and download global NTD datasets

www.thiswormyworld.org

### **GAHI** resources include:

- Short course information and materials on NTD mapping
- Training tools and videos
- Research findings and updates
- NTD focused news and blog
